 - Who.....?
 - When.....?
- He met me in Hyderabad.
 - Where.....?
 - Who.....?
- Saritha bought books in Delhi.
 - What.....?
 - Where.....?
- He went to Warangal by car to buy clothes.
 - What.....?
 - How.....?

15. Read the following news report and answer the following questions.

With 'Krishiraja', a portable device made from bicycle parts, Gopal Bhise has made ploughing feasible for poor farmers. One may often come across stories, pictures, or videos that depict farm hands labouring to till their fields in the country's hinterlands using a heavy, unwieldy wooden plough. To many of us it is just a piece of news, a sad irony that India no longer shines in villages, but not for Gopal Bhise, a small farmer from Jalgaon District, Maharashtra. Bhise owns some land but is so poor that he cannot afford a pair of plough animals or rent a tractor.

One day on his way to the field, Bhise happened to see a grocer transporting four big sacks of flour on a bicycle. He realised that though the activity appeared tedious, the grocer would have saved the cost of cartage, and he thought, "Why should i not modify the bicycle for the purpose of farm operations?" Bhise set to work

on this idea, and after a lot of trial and error, he came out with an implement-fashioned out of the front axle, wheel and handlebar of a standard bicycle-that could be used by marginal farmers to execute functions carried out by bullocks or tractors. People would laugh at him but he persisted in believing in his idea. Perseverance paid off and his portable implement, christened 'Krishiraja' was received very well in the local market and has won him the National Innovation Award.

He has made more than two hundred devices so far. The 'Krishiraja' currently sells for Rs 1200 a piece. There are over 200 farmers who use Bhise's multipurpose bicycle weeder/hoe, who vouch for its success. "It was my frustration at the plight of poor farmers like me that made me develop this device. For us a bicycle is more affordable than a pair of bullocks", says Bhise. With the help of GIAN (Grassroots Innovation Augmentation Network), his innovation has been transformed into a motorised device.

- a. Where did Bhise come from?
- b. What made Bhise develop the implement?
- c. In what way is Bhise's innovation useful?
- d. How did Bhise make his innovation?
- e. What is krishiraj?

MAULANA AZAD NATIONAL URDU UNIVERSITY
Programme: DIPLOMA IN ALL (CBCS) (2017 Batch Backlog)

I-Semester Examinations (December-2019)

Paper No: DPCC101HST

Paper Title: ENGLISH

Time: 2 hours

Answer any ONE question. It carries 10 marks.

(1 x 10 = 10)

14. Read the following passage and frame ten 'wh-' questions.

Bangalore is the capital of Karnataka state. It has very pleasant climate. It is also known as the Garden City. It is famous for its silk industry. It is also important for industries like manufacturing aeroplanes, the wheel and axle plant of the railways, telephone apparatus and electrical appliances. Hindustan Machine Tools factory manufactures HMT watches in Bangalore. The electronics industry is also well-developed in Bangalore. Besides these, there are a large number of cottage industries that deal with handloom, silk, ivory, sandalwood, soap, oil and perfumes. The Indian Space Research Organization was set up here. Bangalore also has several important educational centres like IIM, IISc, etc. It is now known as Bengaluru.

15. Read the following news report and answer the following questions.

With 'Krishiraja', a portable device made from bicycle parts, Gopal Bhise has made ploughing feasible for poor farmers. One may often come across stories, pictures, or videos that depict farm hands labouring to till their fields in the country's hinterlands using a heavy, unwieldy wooden plough. To many of us it is just a piece

of news, a sad irony that India no longer shines in villages, but not for Gopal Bhise, a small farmer from Jalgaon District, Maharashtra. Bhise owns some land but is so poor that he cannot afford a pair of plough animals or rent a tractor.

One day on his way to the field, Bhise happened to see a grocer transporting four big sacks of flour on a bicycle. He realised that though the activity appeared tedious, the grocer would have saved the cost of cartage, and he thought, "Why should i not modify the bicycle for the purpose of farm operations?" Bhise set to work on this idea, and after a lot of trial and error, he came out with an implement-fashioned out of the front axle, wheel and handlebar of a standard bicycle-that could be used by marginal farmers to execute functions carried out by bullocks or tractors. People would laugh at him but he persisted in believing in his idea. Perseverance paid off and his portable implement, christened 'Krishiraja' was received very well in the local market and has won him the National Innovation Award.

He has made more than two hundred devices so far. The 'Krishiraja' currently sells for Rs 1200 a piece. There are over 200 farmers who use Bhise's multipurpose bicycle weeder/hoe, who vouch for its success. "It was my frustration at the plight of poor farmers like me that made me develop this device. For us a bicycle is more affordable than a pair of bullocks", says Bhise. With the help of GIAN (Grassroots Innovation Augmentation Network), his innovation has been transformed into a motorised device.

- a. What made Bhise develop the implement?
- b. In what way is Bhise's innovation useful?
- c. Why do you think Bhise has been awarded the prestigious National Innovation Award?
- d. How did Bhise make his innovation?
- e. What is innovation?

MAULANA AZAD NATIONAL URDU UNIVERSITY
Programme: DIPLOMA IN ALL (NON-CBCS)

I-Semester Examinations (December-2019)

Paper No: C/EC/CM/IT-101

Paper Title: ENGLISH

Time: 3 hours

Max. Marks: 70

نوٹ: Batch 2016 کے طلباء کے لئے حصہ اول (10×1=10) اور Old Batch کے طلباء کے لئے حصہ اول (10×2=20)

 - Anil is more cleverer than Karuna.
 - He looks happily today.
 - She is sick and she can run fast.
 - Work hard, then you will not pass.
 - It is interesting place.

10. Read the following passage and answer the questions that follow:

Eating vegetables raw usually means that you get the nutrients, but old people and children or those suffering from certain stomach disorders, may not be able to digest them easily. Carrots are best eaten lightly cooked. Cooking breaks down the tough cellular walls, making beta-carotene more available for absorption by the body.

Carrots are an excellent source of beta-carotene, the plant form of Vitamin A. One of the first symptoms of rarely occurring Vitamin A deficiency is "night blindness" – the inability of the eyes to adjust to dim lighting or darkness. Vitamin A

combines with a protein in the retina to form visual purple, a substance in the eye which is needed for night vision. If you are deficient in Vitamin A, just one carrot a day should be enough to improve your night vision.

Artificial supplements are no substitute for good eating habits and most people will meet all their vitamin and mineral requirements by following a balanced diet. However a few people do need supplements. Pregnant women need folic acid; the elderly might require vitamin D and iron; and people with osteoporosis are often prescribed extra calcium.

- a. How should vegetables be eaten?
- b. Deficiency of Vitamin A causes.....
- c. According to the writer, Carrots.....
- d. How does a person get the nutrients?
- e. How can we avoid "night blindness"?
